

### 3 Tidy Data

Say your collaborator in biology sends you an Excel spreadsheet with the contents below. This data is **not** in tidy format. Rewrite this spreadsheet data so that it is in tidy format. To minimize writing you may use abbreviations. For example in place of “Allactaga balikunica” write “Al.Ba.”

species	tail length
Allactaga balikunica	<b>177.32</b>
Allactaga bullata	165.2
Allocricetulus eversmanni	<b>18.64</b>
Apodemus uralensis	84.89
Arvicola amphibius	105.14
<b>bold = needs checking</b>	
yellow = from different source
